PROFESSIONAL SUMMARY

Frontend Tech Lead with production experience across MedTech, SaaS, and supply-chain optimization platforms. Sole architect and builder of a 4-portal healthcare platform in a Turborepo monorepo; owner of API contracts, auth design, and code review across a cross-functional team. Ships AI-powered products end-to-end — from architecture to deployment — using React, Next.js, TypeScript, and multi-provider LLM integrations.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, HTML5, CSS3, Framer Motion, i18n, RTL

Architecture & Tooling: Turborepo, pnpm, monorepo architecture, OpenAPI-generated clients, Zod validation, MSW, REST API design, Git/GitHub, CI/CD, Vercel, Vite

Testing & Quality: Playwright (E2E), integration QA, code review, contract testing

AI & Agentic: Claude API, Groq, Gemini, OpenAI, multi-provider failover, prompt engineering, agentic workflows, Claude Code, MCP

Backend Exposure: .NET API integration, Python BFF integration, Supabase, MySQL

WORK EXPERIENCE

Frontend Tech Lead — Soficopharm (MedTech Division), Cairo **Feb 2025 – Present**

Promoted from Frontend Engineer, April 2026 · Full-time, Hybrid

- **Sole architect and builder of 4 production web portals** (doctor, operator, pharmacy, admin) for a Patient Support Program platform at a major Egyptian pharmaceutical group
- Designed the **Turborepo/pnpm monorepo**: shared component system (Tailwind + shadcn/ui), OpenAPI-generated typed API client, and MSW mocking layer enabling frontend delivery ahead of backend readiness
- Own the **API contract and auth design** — daily contract review and integration QA loop against a .NET modular monolith backend
- Led **legacy system retirement** via strangler-fig migration and org-wide repository hygiene
- Run code reviews and coordinate delivery across Flutter, QA, UI/UX (Figma handoff), and PM; author requirements reconciliations in the absence of a BA
- **As Frontend Engineer (pre-promotion):** built a SaaS clinic management platform from scratch — Google Maps API, multilingual i18n, automated booking, responsive and accessible across devices

Software Engineer (Part-time, Remote) — Datalentech **Aug 2025 – Present**

- Built a **6-screen supply-chain optimization dashboard** (React, TypeScript, Tailwind, Zod) for a food-industry client: demand forecasting, SKU allocation, frozen-inventory recommendations, and market intelligence over a Python optimization backend
- Designed the **frontend–BFF integration contract**: OpenAPI-derived Zod schemas, async enqueue–poll optimization lifecycle, multipart uploads; shipped a forecast **evaluation module** (WAPE, bias, weighted MAPE) surfacing ML model quality to operators
- Led a **six-dimension audit of a ~156k-line React recruiting platform** (architecture, security, performance, dependencies, production readiness) and delivered the sequenced fix plan as an executive report
- Cut the entry bundle **58% (5.3 MB → 2.2 MB)** via route-level code splitting across 37 routes; added error boundaries, logout PII purging, and security headers
- Refactored 2,500+ and 7,000-line legacy god-components into modular containers under a 400-line cap; completed a full **Chakra UI → Tailwind migration** (42 files) and collapsed three data-access layers onto a generated OpenAPI client
- Authored a **per-screen operations manual** (9 chapters, ~1,600 lines) verified against the live UI

Frontend Developer (Freelance, Remote) — Silicon Squire **Sep 2024 – Jan 2025**

- Built a dynamic product showcase for Babil Agency using React and Tailwind CSS
- Developed reusable components handling variable data structures, improving maintainability

Coding Instructor — Mind Builders Academy **Jan 2023 – May 2024**

- Taught 250+ students across Scratch, Python, HTML, CSS, JavaScript, and Bootstrap
- Created practical workshops improving student coding accuracy and project design quality

PROJECTS

ResuForge — AI Resume Builder · React, Next.js, Tailwind, Supabase, Groq/Gemini · resu-forge.vercel.app

- Independently designed, built, and shipped a production AI resume builder with real-time split-screen preview, AI bullet rewriting, undo/redo command architecture, and ATS scoring
- **Arabic-first RTL DOCX/PDF export** with Arabic-aware AI suggestions; PDF/DOCX/JSON import via renderer factory pattern
- **5-provider AI failover chain** with daily spend caps; Supabase auth + cloud sync; CI/CD on Vercel

Job Connect — AI Job Platform · React, Tailwind, .NET, Python

- Full-stack job platform with role-based dashboards (employer / seeker / admin), resume-parser AI model, and job recommendation system

EDUCATION

B.Sc. Computer Science & Artificial Intelligence — Helwan University **2021 – 2025**

CERTIFICATIONS & LEARNING

- Associate AI Engineer for Developers — DataCamp (in progress)
- AI Agent Fundamentals — DataCamp (2026)
- Front-End React.js Development Diploma — Route Academy (2024)
